plantr

App Feedback Form

We are "Plants R Us" - a group of RMIT Information Technology students working on a project where we develop an app.

The app we have created is called plantr, and it allows users to register, list plants they would like to swap (such as indoor plants, cuttings, seeds etc), and then swap them with other users in their local community. It aims to build local community and get indoor plants into more households, where they will have lots of great health benefits.

We have created a 'wireframe' which is a visual representation of how our app will look. We would really value your feedback!

"The overall look of the app is appealing"				
Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly Agree

"This app meets a need in the community"				
Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly Agree

"From looking at the wireframe, I understand how I would create an account, list a plant, and ask someone else for a plant they had listed"				
Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly Agree
